Petition for Human Rights!

"If you stand for nothing, you will fall for anything" ~ Malcolm X

UWaterloo is partnered with institutions that are complicit in war crimes! Petition to have UW take a stand and end these partnerships.

As Israel continues its apartheid against Palestinians, the world stands and watches in near silence. The state's violation of human rights, breach of international law, and committing of war crimes has only been made possible by its support from Israeli academic institutions that have helped develop weapons and technologies, knowing they would be used to promote its apartheid against Palestinians.

By knowingly developing technology used for such a purpose, they are actively and directly complicit in the violations of international law. Some of these institutions are also partnered with UWaterloo. Read the full report [here](#) and join the campus-wide student body in the mission to have our university sever ties with institutes that are undoubtedly complicit in war crimes.
