Voter's Guide

As students, you have the power to shape the future of WUSA and your campus experience.

One of the most important ways to exercise that power is by voting in the annual WUSA Board of Directors election. The Board plays a crucial role in:

- guiding our student association
- setting priorities
- ensuring that student voices are heard

Here's what to look for in a candidate:

Leadership Skills
Someone who can rally a team around a common goal and is comfortable making tough decisions on behalf of the student body.

Analytical Thinking
Helps them evaluate the pros and cons of different proposals and make data-informed decisions.

Systems Thinking
Understanding of how different parts of an organization or issue connect. A strong candidate will consider how changes in one area of student life might affect other areas.

Research Assessment
Good candidates can sift through research, data, and student feedback to identify what's most important.

Goal Prioritization
With so many competing interests and limited resources, candidates should have a clear vision for WUSA's future and the ability to focus on what is best for the organization.

Understanding of Governance
Ability to ensure decisions are made transparently and with accountability within the set governance framework.

Commitment to Student Advocacy
Passionate about representing student interests, amplifying your voice, and pushing for positive changes that enhance the student experience.

Remember, your vote matters. The Board of Directors will shape your student experience, so take the time to consider what each candidate brings to the table.

Ask Yourself...

- ☐ Does this candidate have the leadership experience to represent the student body effectively?
- ☐ Can they break down complex problems and offer well-thought out solutions?
- ☐ How do their goals align with what matters most to you and your peers?
- ☐ Do they understand how decisions today will impact the future of our campus?
- ☐ Are they committed to making decisions based on research, student input, and what's best for the collective?
